

RADIO TRANSMITTERS

JCK207

**JCK250/
JCK255**

Elbow switches with built-in radio transmitters are useful in environments where it is difficult or undesirable to pull cables to the elbow switch.

Examples of such environments could be preservation buildings like churches or other listed buildings.

Technical specification:

- *Battery lead: 200 mm*
- *Modulation: AM/ASK*
- *Encryption: Rolling Code*
- *Frequency: 433,92 Mhz*
- *1 Channel*
- *Battery: 6LR61 - 9V*
- *Power consumption: 17 mA*
